

Feedback from June 12 Meeting

Agriculture/Forestry – Designate high/medium/low priority for each option.

Transportation/Land Use – Additional ideas:

Transportation Fuels GHG Tax

Sequence lights (call out under Smart Growth?)

Roundabouts (local decision)

TL15 – Add language about the importance of education

TL2b – Expand language to include transit

Energy Supply

Revisit tax credits

Call out solar (one of several renewables)

Include Nuclear Generation (advance generation technology)

Add language so options resemble others

RCI

#28 – Why in Bin C. Could it be bumped. Is now a program at SLCC.

Cross-Cutting

Governor has already decided there will be a cap and trade program

Take into consideration the ability to move forward and be competitive.

Consider the cost of doing business and the carbon footprint. Possible excise tax on products to balance.

All Options

Use a sequential numbering system under each option. Make sure the “original” numbers are footnoted (in case someone wants to check.)

Take into consideration the impact on business and residents – unintended consequences
